## EROTICA COLLABORATION

First of all, thanks so much for showing interest in working with me! It means a lot to know that others enjoy my work enough to have the desire to join me on my journey.

There are many options for shooting erotica with me, but there's also a few requirements due to the work being both physically and personally sensitive. Below is a brief description of the type of work I do, the type of people I'm looking for, and some requirements for promoting the work we create.

- I'm looking for people that are **sexually open-minded** and open to exploring ideas and all things erotica related – preferably people who already create their own content and will be able to go on to use and gain from the content we have created
- I like to get to know the people I'm working with. **I care about you as a human**, I'm open to collaboration of ideas and enjoying the time we spend working on our project/s.
- I will be creating both still **images and video**. There are many ways of how this may be done
  - Me shooting, while being directly involved in the scene
  - Me shooting documentary style, with me NOT being involved in the scene
  - **A trusted photographer**, often my partner Oscar Mike shooting me interacting with others with him involved in the scene, or without him involved in the scene
- There are no certain body requirements. All I ask is that we are all **clean and respectful**, and safe sex practises are used at all times.
- **You must be comfortable showing your face**. Expression and emotion are a huge part of what I am wanting to capture.
- All parties need to be comfortable promoting the teaser images etc to be able to sell the final product so that we can all make money
  - If you have a dedicated social media following, this is a plus but not necessary
  - You must be comfortable sharing promotional images etc your social media
  - **This means that you need to not have any hang ups about friends/family etc finding porn of you on the internet.**
  - Sales work best when the models really push the promotions on their platforms and so this is highly encouraged.

**Below is a breakdown of how collaborating on erotica/porn/adult content shoots produced by Oscar Mike (Shawn Rolton) and Nakita Fox work.** As with all things there can be some flexibility so please consider this just a guideline until discussed one on one.

- Collaboration on erotica content essentially means an exchange of time and talent rather than money. This is seen as your time and talent in exchange for mine. We all work together to make the project and promote it afterwards.
- There is a range of erotica projects we are currently working on but we are always happy to discuss any ideas you might have.
- Once the post production is finished, all promotional material is sent to all involved and the content goes live on the Oscar Mike and/or Nakita Fox web stores. [www.oscarmike.co/store](http://www.oscarmike.co/store) [www.nakitafox.com/store](http://www.nakitafox.com/store)
- All sales from the first month are split equally between all involved. This is either paid out weekly or in a lump sum at the end of the month depending on the situation.
- Once the one month period is finished all files are given to the model(s) to use. The models are free to monetize them on their own personal platforms and share them publicly without any financial compensation to other parties. I am also free to use the content we create after the month is up in the same way without further compensation to the other models.
